

The **TravStar1 POS FleetLock System** is the latest solution from Fiscal Systems that helps fuel marketers increase their profits. Built on the same software that powers our nation's largest truckstops and c-stores, the FleetLock System is an unattended fuel marketing solution that includes a web portal, outdoor payment terminal and site controller.

The web portal provides a real-time view of each site's customer and sales activity, convenient way to manage one or several sites remotely, and historical sales reporting. All of the web portal functions are available from a secure web browser in the office or on the road.

An outdoor payment terminal constructed of heavy-duty, brushed stainless steel houses a large, color touchscreen for quick, secure transactions that will differentiate the unattended fueling site and bring in new customers.

The site controller not only provides support for electronic and mechanical dispensers, it also expands the electronic payment portfolio that fuel marketers can offer their customers to include branded, private label, bankcard and heavy fleet credit cards. The site controller can also connect directly to credit hosts for high-speed authorizations.

For more information on how the TravStar1 POS FleetLock System can differentiate your unattended fuel marketing sites and increase your profits, please contact Fiscal Systems, Inc. 102 Commerce Circle, Madison, AL 35758. Toll Free: (800) 838-4549. [www.fis-cal.com](http://www.fis-cal.com)
